

randutils::randindices

propose::next

```
graph LR; A[propose::next] --> B[randutils::randindices]
```

A diagram showing a call from the `propose::next` function to the `randutils::randindices` function. The `propose::next` function is represented by a white rectangular box on the right, and the `randutils::randindices` function is represented by a gray rectangular box on the left. A dark blue arrow points from the `propose::next` box to the `randutils::randindices` box, indicating the direction of the function call.
